

Mount Pleasant Library Report

EXHIBIT: 5

Plans Considered Compromises

(a) There have been at least two plans showing a lower-level expansion affirming the chance for other design options.

- **Scheme “G”** created with the assistance of Ward One Councilmember Jim Graham (May 2009).
- **DCPL's design plans (Winter 2008)** that depict an expansion out of the lower level without destroying the historic sunroom.

(b) **Real World Examples of Alternatives** – An atrium built around existing historical structures is not new in concept as depicted by the attached images. Neither is the idea of underpinning the original structures with new lower levels. See the many images and descriptions that follow.
